PROFILE SUMMARY

Skilled frontend developer proficient in HTML, CSS, and JavaScript, with expertise in React.JS. Specializes in creating responsive and intuitive user interfaces. Committed to delivering high-quality web solutions that meet user and business requirements.

EXPERIENCE

Front End Developer

Tcare Technology   📅 02/2024 - 05/2024   📍 Chennai

- During my internship at Tcare Technology Pvt Ltd as a frontend developer, I focused on creating intuitive user interfaces while optimizing website performance and ensuring cross-browser compatibility, honing my skills with React.js.

Python Developer

AB Technology   📅 2022   📍 Tirunelveli

- I had been a intern as a Python Developer in AB Technology for a period of one month, I have learnt a lot about the team work and got a great experience and knowledge.

PROJECTS

Online voting system in face recognition

Technologies used: HTML, CSS, javascript, Sql

- Implemented a User-Friendly facial recognition online voting system using HTML, CSS, and XAMPP server for the frontend and Python for face recognition.

Movie Ticket Booking Application

Technologies used: ReactJS, react router DOM, Hooks, CSS, HTML

- Developed a dynamic and responsive movie ticket booking application using ReactJS, enabling users to easily browse, select, and book movie tickets online. The application features a user-friendly interface and seamless navigation, ensuring an optimal user experience.

Text to Speech

Technologies used: ReactJS, react router DOM, Hooks, CSS, HTML

- Experienced in developing text-to-speech applications using pure JavaScript, HTML, and CSS, Created a project where users can type a word, and the application instantly vocalizes it, enhancing accessibility and user interaction. Leveraged JavaScript for text manipulation and audio playback, combined with HTML and CSS for seamless user interface design. Passionate about implementing innovative solutions and exploring the full potential of web development technologies.
